Gokul Govindaraj

Software Developer | Angular | Ionic | MERN Stack

+91-6384929988 | gokulgovindaraj44@gmail.com | Chennai, India | itsggokul.netlify.app

Profile Summary

Software Developer with **4+ years** of experience in **Angular** and **Ionic** development for healthcare and IoT applications. Skilled in reusable components, state management and REST API integration. Also experienced in **MERN stack** development using **React.js**, **Node.js**, **Express.js** and **MongoDB**.

Technical Skills

- **Frontend:** Angular (v10+), React.js, Ionic Framework (v5+), TypeScript, JavaScript (ES6+), HTML5, CSS3
- **UI & Styling:** Tailwind CSS, Angular Material, Bootstrap, Responsive Web Design
- **Architecture & State:** RxJS, NgRx, Component Architecture, Lazy Loading, Change Detection
- **Backend & APIs:** Node.js, Express.js, RESTful APIs, JWT (Authentication & Authorization)
- **Databases:** MongoDB, MySQL, SQL, NoSQL
- **Testing & Tools:** Jasmine, Karma, Git, GitHub, Bitbucket, Jenkins, CI/CD, VS Code
- **Methodologies:** Agile/Scrum, Code Reviews, Performance Optimization, Cross-Browser Compatibility

Work Experience

Frontend Engineer – Care2Data Private Limited, Chennai **Dec 2025 - Apr 2026**

- Built scalable, responsive Angular interfaces for **Clinical Data Quality** and Validation platforms.
- Collaborated with cross-functional teams in an Agile environment.

Software Developer – Careworx Healthcare Private Limited, Chennai **Jun 2022 - Aug 2025**

- Designed user-friendly interfaces for Angular **healthcare** and **IoT** applications across **3–5 projects/modules** using TypeScript, Angular Material and RxJS.
- **Built 20+** reusable Angular components to support consistent UI patterns and improve code maintainability.
- Delivered features for **2–3 mobile apps** using Angular, Ionic and Capacitor for Android and iOS.
- Created interactive dashboards and data visualizations using **Apache ECharts**.
- Manually tested frontend workflows and resolved 11–25 reported frontend issues through debugging and validation.
- Maintained **LMS, EHS** and **Digital ICU** modules and partnered with backend teams and designers in Agile sprints.

Software Developer – Scentric Networks Private Limited, Chennai **Jan 2022 - Jun 2022**

- Created responsive, accessible web pages with **HTML, CSS, JavaScript and Bootstrap**
- Ensured consistent UI across multiple devices and browsers through cross-browser verified.

Project Experience

Expense Tracker - React.js | Node.js | Express.js | MongoDB **Link**

- Developed a full-stack expense tracking application with the MERN stack
- Implemented income and expense management with category-based transactions.
- Designed a dashboard showing total income, total expenses, balance and monthly spending.
- Visualized category-wise expenses with monthly filtering.
- Integrated RESTful APIs with Axios to connect React frontend and Node.js/Express backend.
- Secured application routes with authentication and crafted reusable React components.

Clinical Data Quality and Validation - Angular | TypeScript | Tailwind CSS

- Developed reusable Angular components and integrated REST APIs for a Clinical Data Quality and Validation platform.
- Migrated UI styling from Bootstrap to Tailwind CSS, reducing production CSS bundle size by 35% and accelerating component development cycles by 20%.
- Expanded unit-testing scenarios using Jasmine and Karma, identifying test failures and strengthening application reliability.
- Leveraged AI-assisted tools to identify additional validation scenarios and broaden test-case coverage.

Healthcare - Angular | Angular Material | Tailwind CSS | Ionic | Capacitor | TypeScript

- Enhanced healthcare modules, including Digital ICU, by developing workflows, forms, validations, dashboards and reusable components.
- Delivered cross-platform mobile applications for Android and iOS using Ionic Angular and Capacitor.
- Integrated approximately 21–30 REST API endpoints to retrieve, display and manage application data across frontend workflows.
- Applied RxJS, NgRx and modular component architecture to organize application state and frontend workflows.
- Refined responsive web and mobile interfaces to provide consistent user experiences across devices.

IoT - Angular | TypeScript | Tailwind CSS

- Engineered responsive web interfaces for IoT-based industrial applications using Angular and TypeScript.
- Structured reusable, modular Angular components to support maintainable application features.
- Optimized navigation and application loading through lazy loading, routing, reactive forms and RxJS.
- Linked REST APIs and interactive data visualizations using FusionCharts and Apache ECharts.
- Strengthened cross-device compatibility through responsive UI development and performance-focused implementation.

E-Learning - HTML | CSS | Javascript | Bootstrap

- Structured reusable Angular components and ConnectedRESTful APIs.
- Constructed responsive UIs with Bootstrap in the initial stages of the project.
- Optimized application reliability through evaluated case development, execution and debugging.
- Investigated application defects, debugged frontend issues and verified fixes to support reliable application functionality.

Education

B.Sc Data Science **Jun 2018 - Apr 2021**
Nehru Memorial College, Puthanampatti – Tiruchirappalli

Additional Information

Certifications: Great Learning – HTML, CSS, MySQL, Excel, Ecommerce Website with HTML & CSS

Soft Skills: Problem-solving, analytical thinking, adaptability, teamwork, continuous learning
