

# Gokul Govindaraj

## Software Developer | Angular | Ionic | MERN Stack

+91-6384929988 | gokulgovindaraj44@gmail.com | Chennai, India | [itsggokul.netlify.app](https://itsggokul.netlify.app)

### Profile Summary

Software Developer with **4+ years** of experience delivering **Angular** and **Ionic** applications for healthcare and IoT platforms. Skilled in state management, reusable component design, and REST API integration. **Full-stack** exposure through **MERN** projects, including about 1 year of React experience.

### Technical Skills

- **Frontend:** Angular (v10+), React.js, Ionic Framework (v5+), TypeScript, JavaScript (ES6+), HTML5, CSS3
- **UI & Styling:** Tailwind CSS, Angular Material, Bootstrap, Responsive Web Design
- **Architecture & State:** RxJS, NgRx, Component Architecture, Modular Routing, Lazy Loading, Change Detection
- **Backend & APIs:** Node.js, Express.js, RESTful APIs, JWT (Authentication & Authorization)
- **Databases:** MongoDB, MySQL, SQL, NoSQL
- **Testing & Tools:** Jasmine, Karma, Git, GitHub, Bitbucket, Jenkins, CI/CD, VS Code, Android Studio, Xcode
- **Methodologies:** Agile/Scrum, Code Reviews, Performance Optimization, Cross-Browser Compatibility

### Work Experience

#### Frontend Engineer – Care2Data Private Limited, Chennai

Dec 2025 – Apr 2026

- Built scalable, responsive Angular interfaces for Clinical Data Quality and Validation platforms.
- Collaborated with cross-functional teams in an Agile environment.

#### Software Developer – Careworx Healthcare Private Limited, Chennai

Jun 2022 – Aug 2025

- Designed user-friendly interfaces for IoT-based platforms supporting medical and industrial applications
- Maintained core LMS, EHS, and Digital ICU modules.
- Delivered cross-platform web and mobile applications for 2 platforms (Android and iOS) using Angular, Ionic, and Capacitor
- Optimized performance through modular architecture and lazy loading.
- Partnered with UI/UX designers and backend teams in Agile sprints.

#### Software Developer – Scentric Networks Private Limited, Chennai

Jan 2022 – Jun 2022

- Created responsive, accessible web pages with HTML, CSS, JavaScript, and Bootstrap
- Ensured consistent UI across multiple devices and browsers through cross-browser verified.

### Project Experience

#### Expense Tracker – React.js | Node.js | Express.js | MongoDB

[Link](#)

- Developed a full-stack expense tracking application with the MERN stack
- Implemented income and expense management with category-based transactions.
- Designed a dashboard showing total income, total expenses, balance, and monthly spending.
- Visualized category-wise expenses with monthly filtering.
- Integrated RESTful APIs with Axios to connect React frontend and Node.js/Express backend.
- Secured application routes with authentication and crafted reusable React components.

### **Clinical Data Quality and Validation – Angular | TypeScript | Tailwind CSS**

- Engineered reusable Angular components and REST API integrations for a Clinical Data Quality and Validation platform.
- Refactored UI from Bootstrap to Tailwind CSS, shrinking production CSS bundle size by 35% and speeding up component development cycles by 20%.
- Expanded unit-test scenarios using Jasmine and Karma, identifying and resolving failures to improve application reliability.
- Strengthened quality-checked coverage by leveraging AI-assisted tools to identify additional validation scenarios.

### **Healthcare – Angular | Angular Material | Tailwind CSS | Ionic | Capacitor | TypeScript**

- Enhanced healthcare modules including Digital ICU, configured workflows, forms, validations, dashboards, and reusable components.
- Delivered cross-platform mobile applications for Android and iOS using Ionic Angular and Capacitor.
- Embedded RESTful APIs with Angular applications to support real-time application data workflows.
- Optimized application architecture using RxJS, NgRx, modular components, and performance-focused development practices.
- Refined usability across devices through responsive Angular web and mobile interfaces.

### **IoT – Angular | TypeScript | Tailwind CSS**

- Engineered responsive web interfaces for IoT-based industrial applications using Angular and TypeScript.
- Structured reusable and modular Angular components to improve maintainability across application features.
- Optimized navigation and application loading through lazy loading, routing, reactive forms, and RxJS.
- Linked REST APIs and interactive data visualizations using FusionCharts and Apache ECharts.
- Improved cross-device responsiveness through performance-focused UI development.

### **E-Learning – HTML | CSS | Javascript | Bootstrap**

- Structured reusable Angular components and ConnectedRESTful APIs.
- Constructed responsive UIs with Bootstrap in the initial stages of the project.
- Optimized application reliability through evaluated case development, execution, and debugging.
- Used AI-assisted tools to improve assessed scenarios and coverage.

### **Education**

#### **B.Sc Data Science**

**Jun 2018 – Apr 2021**

Nehru Memorial College, Puthanampatti – Tiruchirappalli

### **Additional Information**

**Certifications:** Great Learning – HTML, CSS, MySQL, Excel, Ecommerce Website with HTML & CSS

**Soft Skills:** Problem-solving, analytical thinking, adaptability, teamwork, continuous learning
